

Installation Technician

- Permanent, full-time

The Company

Galebreaker Group Ltd. (Galebreaker) is internationally recognized for selling quality weather protection products for agriculture and industrial purposes. For the past 30 years Galebreaker has grown into a sizeable company and has plans to continue to grow in the coming years.

The company headquarters and factory is based in the pleasant rural town of Ledbury, Herefordshire, from which products are exported worldwide through a distributor network in Europe and Sales agents worldwide.

Galebreaker currently has a vacancy for an Installation Technician in a permanent role.

All interviews will be held at Galebreaker House, Ledbury HR8 2SS.

Role

The Installation Technician will be responsible for installing or supervising the installation of Galebreaker products both in Agricultural and Industrial sector. Projects undertaken can range in complexity dependent on what and where the products are being installed.

As an Installation Technician the main responsibilities will include:

- the installation of Galebreaker products on Agricultural & Industrial sites including power stations and off-shore oil rigs
- supervision of customers own labour on site installations
- reading, understanding and following the installation instructions provided for the products being installed
- assisting with Production in the Factory when not on site
- assisting with R&D projects as required, including testing, giving practical feedback to new developments
- ensuring company Vans are kept in an orderly and road worthy manner
- assisting with Site Surveys when required
- completing job related paperwork, including timesheets / site diary / reports / completion certificates as per company procedures.
- following the company and customer's health and safety procedures and practices are followed throughout the installation

Skills and Qualifications

- Experience and evidence of skills for mechanical fitting of products is essential.
- Minimum 3 years' experience in similar* role ideally involved in an industrial or Agricultural environment. Mechanical fitting, Roller doors, Curtain walling, door/window fitting, partitions, and other similar backgrounds would be considered relevant. Involvement in erecting Industrial and Agricultural buildings would also be of interest.
- Experience in fitting automated systems such as doors and curtains, including

motor limit setting would be an advantage

- Some basic Electrical/Electronic knowledge
- A good understanding of mechanical engineering principles that can be applied to Galebreaker products and systems.
- Must be able to work at height using Powered access equipment and static towers
- Travelling throughout the UK, Ireland, Europe and the rest of the world is a prerequisite. Long periods away from home may be required and the candidate must be comfortable with this.
- A full UK Driving License and Valid Passport for worldwide travel is essential

Person Specification

- Good organisational skills
- Attention to detail
- Flexible and adaptable
- Good communication skills at all levels (verbal and written)
- Ability to assess, decision make and address situations as they arise
- Have a logical approach to solving problems
- Self-motivated with a desire to achieve high standards
- Interest and willingness to develop skills
- Desire for continued development and improvement both personally and at the workplace.
- An interest and willingness to develop skills and keep abreast with advancements in product development. Candidates must show a willingness to undergo training when required
